

Customer Preparation for In-Store Consultation

THERE ARE A FEW THINGS THAT WE NEED YOU TO DO BEFORE COMING IN FOR YOUR IN-STORE CONSULTATION.

1 First, use your digital camera or smart phone to take pictures of the rooms you want window treatments for. Make sure that the flash is always turned on but in some cases you may get a better shot with the flash off. Include wide shots of the windows and nearby furniture.

2 We need you to take some general measurements of your windows and walls. Don't worry too much about the measurements being exact because we will come out to your home at a later date to take some professional measurements. *See window graphic for required measurements.*

3 Now email your pictures to design@StyleAndStitch.net with your last name as the subject. If you are having difficulty doing this step, just bring your camera/smart phone with you to your appointment. You will also need to bring your measurements with you to your consultation. If project is completing an existing room please bring a sample of the fabrics in the room (pillows or cushion, wall color, photo of rug, etc...).

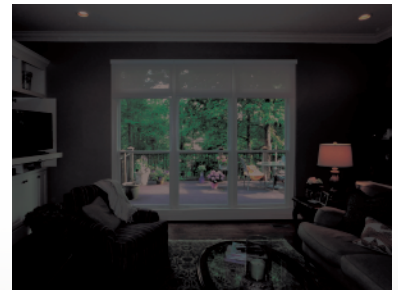

In your consultation we will help you design, find fabrics that coordinate colors with your existing furnishings and choose hardware. Then we will provide you with an estimate for your review. After a deposit is made, we will set up a time to come out to your home and take professional measurements. We will then fabricate your treatments in our workroom.

IF YOU WOULD PREFER AN IN-HOME CONSULTATION
PLEASE GIVE US A CALL.
